Instructions

Complete every item without consulting model outputs, generated traces, cue text, or experimental results. Do not edit, reorder, replace, or resample source content. Use the six checks below exactly. Assign one final status only after review: **PASS**, **MINOR_LANGUAGE_ONLY**, **MATERIAL_MISMATCH**, or **UNCERTAIN**. The initial blank status is intentional and is not a review outcome.

Six checks for every item

1. Meaning preserved: Urdu stem asks the same question as English.

2. Option correspondence preserved: Urdu A/B/C/D correspond to English A/B/C/D in the same order.
3. No missing information: nothing in English stem/options is absent from Urdu.
4. No added hint: Urdu adds no information, phrasing, or emphasis that makes the answer more identifiable.
5. No obvious mistranslation: no wrong term, garbled sentence, sign/number error.
6. No answer-option reordering mismatch: source answer key still points to the same content in both languages.
